---

Chip,  
I'll follow-up with Bill E this morning on items 3 & 5. I talked to Cy Young about whether Schnitzer obtained a permit for their recent dock work in the International Slip. Cy said Schnitzer owned the submerged lands in the slip & therefore didn't need a proprietary permit from DSL. Cy thought Schnitzer may have done the dock work under some nation-wide permit & he suggested I contact the Corps..., which I haven't done yet.

Cy also said he thought Schnitzer was pretty good about getting all necessary permits.

Subject: Fw: Bill Egan question

Jim/Matt

Bill Egan called to follow-up on some of the questions he raised on our CAG boat tour. I am planning to get back to him on Items 1, 2, and 4. Can you guys weigh in on items 3 and 5? It would be good to get back to him before the CAG meeting; otherwise I expect he may raise these questions again at the meeting.

thanks  
Chip

	Subject Bill Egan question

Bill Egan - (b) (6) Here is what I can glean from my notes.

1. Wanted to get more information from you about your discussion on his group gathering fish from every river mile.
2. Asked for information on sturgeon sampling results.
3. Looking for more information on source control questions. I talked with him a bit more to clarify his concerns and he talked about ongoing activities he has observed (two specific examples he named were Gunderson sandblasting, and things being dropped by cranes at Schnitzer, plus a barge dismantling.) So this might take a bit more work to satisfy his questions since it's not existing contamination he is asking about.
4. He also asked if Schnitzer got permits about their latest in water work.
5. He also talked about a collapsing dock at Gunderson and what should be done there.
